Folding scaffold

A big solution for small heights

The folding scaffold **Goldamio**, is a new platform concept that allows the user to install it very simply and quickly so that he/she can work comfortably and secure.

It has been designed for working at small and medium heights in a comfortable way, assuring increased security and therefore a higher performance.

Folding scaffold

Useful

It can be easily moved without having to disassemble it. Because of its wheels and volume it is easy to pass through doors and narrow places. All models are equipped with a handy tray for tools.

Simple

Easy assembly, without the need for tools.

Comfortable

Due to its little weight and reduced volume, it is very easy to manage, transport and store.

Safe

The slip-proof platform provides high stability and more space for a comfortable and secure working area. All models are equipped with wheels with locking system.

Versatile

The platform can be regulated every 14 cm up to 6 different levels.

Stairs to work at different heights.
